EXAMINER'S AMENDMENT

Applicant's amendment and response received on 2/2/07 has been entered. Claim 38 is pending.

Applicant's amendment to the specification to insert the appropriate SEQ ID NOS after each recitation of a nucleotide or amino acid sequence places this application in compliance with 37 CFR 1.1821-1825.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Lizette Fernandez on 4/25/07.

The application has been amended as follows:

1. In claim 38, line 3, the word -- specific - - has been inserted after the words "B cell".

Following entry of this examiner's amendment, claim 38 is allowed.

Art Unit: 1633

The following is an examiner's statement of reasons for allowance: claim 38 is free of the prior art of record as the prior art does not teach or suggest administering a plasmid vector encoding an antigen or antigenic epitope operably linked to a B cell specific promoter or other expression element to a lymphoid tissue. While the closest prior art, Hurpin et al., of record, teaches the intrasplenic administration of a recombinant vaccinia encoding an antigen, Hurpin et al. does not teach the intrasplenic administration of a plasmid encoding antigen, nor the use of B cell specific expression elements. It is further noted that Hurpin et al. demonstrates that routes of administration capable of successful induction of immune responses using vaccinia virus do not necessarily correlate with the routes of administration of plasmid vector capable of inducing immune responses, as Hurpin et al. shows that while intramuscular injection of vaccinia virus does not induce immune responses, intramuscular injection of plasmid does. As such, the skilled artisan would not have a reasonable expectation that success with intrasplenic administration of vaccinia virus encoding antigen would predict success with intrasplenic administration of plasmid vector encoding antigen.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication from the examiner should be directed to Anne Marie S. Wehbé, Ph.D., whose telephone number is (571) 272-0737.
